Work Experience

- **Junior On-Site IT Specialist** **May 2019–Dec 2019**
Joseph Apps Support *Burlington ON*
 - Collaborated daily with the CEO as an apprentice and met face-to-face with clients on-site to discuss and resolve their hardware issues
 - Balanced other responsibility as a Web-Developer for when clients require front-facing work completed using HTML, CSS, and JavaScript
 - Independently lead efforts with clients which increased efficiency in Lead's day to focus on onboarding and growing the company

- **Front-end Developer** **May 2018–Dec 2019**
Highmark Global *Mississauga ON*
 - Realized the vision of the company to reality into a website using Angular, Typescript, APIs, MongoDB, and Spring Boot in an efficient manner and as a result reduced development time by 40 percent in each phase
 - Lead weekly demos and front-end discussions with the CEO, CTO, and Back-end Development Team to ensure product was up to standard, requirements, and code was error free
 - Learned and became an expert in Highmark Global's systems within a short period of time

- **Junior Quality Assurance** **May 2016–Aug 2016**
Buchanan Technologies *Mississauga ON*
 - Developed and validated Python scripts to increase the working environment's velocity by 90 percent and as a result reduced the QA team's mean time to identify and to be able to perform a comprehensive error analysis
 - Developed a digital database using Python and Web Scraping modules to store data in Excel which reduced the team's workload significantly and allowed them to focus on higher priorities
 - Built, maintained and executed tests with large data sets on databases utilizing SQL, Excel, and Jira's cloud space with Zephyr while communicating closely with the Sr. QA Specialist and Lead Developer

| ◦ Javascript | ◦ C Sharp | ◦ Spring Boot |
| ◦ Angular | ◦ PHP | ◦ Git |
| ◦ HTML | ◦ Shell Scripting | ◦ Node.js |
| ◦ CSS | ◦ MongoDB | ◦ Unity |

Notable Projects - <https://github.com/Pettyjohnboi>

- *'Appointment Setting Website - 2023'* Developed a website using React with Javascript. It is capable of setting an appointment and getting an email or SMS in confirmation. A user can also look at a list of all appointments they have made, with the ability to update or delete
- *'Vice Virtue Vouche - 2021'* A fresh new way to look at Tic Tac Toe built with PHP. Vice side tics with alcohol, weed, etc. Virtues tacs with water, sleep, etc. When a vice or virtue player wins a 'Vouche' is shown on screen talored to the icons used in victory.
- *'Development of Bardaga - 2016'* Developed a player vs. player strategic fighter game in Unity and C Sharp with a grid-based environment. Player's goal is to outmaneuver the opponent with use of various abilities called badges. The novelty aspect of Bardaga is that the player is a customizable-chess piece, utilizing each badge-type to increase chances of winning.
